• Insert citations and create bibliographies using into your assignments
EndNote

Introduction to Library support for EndNote x7 and EndNote Online

About EndNote

What is EndNote?
EndNote is a software program that helps you organise your research. EndNote allows you to:
- Record, store and manage references
- Add references manually or search and download directly from online databases and library catalogues
- Use a feature called Cite While You Write which allows you to insert references and automatically create bibliographies for your papers

Where to get EndNote

Caution: Currently EndNote is not supported by Microsoft 2016, so do not install Office 2016 if you intend on using EndNote.
UCD has access to two versions of EndNote: EndNote X7 and EndNote Online.
EndNote X7
If you are a UCD staff member you can download EndNote X7 to a UCD-owned computer. Go to UCD
