

# UCD HEALTH SYSTEMS SEMINAR SERIES

## WHEN

December 10, 2015  
11am – 12.30pm

## WHERE

**B006, Health Sciences Centre**  
University College Dublin, Belfield, Dublin 4

The first of UCD Health Systems monthly seminar series will be delivered by Professor Donna Wilson from University of Alberta, Canada. Professor Wilson's research focuses on health services utilization and health policy, primarily in relation to aging and end-of-life care. Through employment in hospitals and long-term-care facilities, both in and outside of Canada, in managerial and clinical posts she has developed a wide range of clinical skills and knowledge.

Professor Wilson will give an overview on charting the end of life care needs of older people with particular reference to the need for shifting end-of-life care and palliative care out of hospital settings. Professor Wilson will also provide some insight into her patient-centered study on the factors contributing to high use of hospitals. We anticipate this will be a highly interactive event and we look forward to welcoming you on the day.

## GUEST SPEAKER

**Professor Donna  
Wilson, University of  
Alberta, Canada**

'Why Health Systems  
Research Matters -  
Insights from a Canadian  
Nurse Researcher'

**PhD Educational Administration,**
